

CONSTRUCTION ALERT

City of Flagstaff ○

I-17, Southbound Airport TI to Munds Park TI Improvements

The Arizona Department of Transportation (ADOT) is making improvements to southbound Interstate 17 (I-17) between Airport Traffic Interchange (TI) and Munds Park TI beginning in late May 2008.

This project will remove the top layer of asphalt to identify and repair potential problem areas in the roadbed. Once repairs have been made, a new layer of rubberized asphalt will be placed on the improved roadbed. There will be traffic control associated with this project, and ADOT will make every effort to minimize impacts to the traveling public.

During asphalt removal, repair work, and paving operations, motorists may experience lane restrictions, reduced speed, and rough road conditions in southbound lanes. All work will be performed during daytime hours. ADOT will implement commuter impact mitigation techniques during peak traffic hours at known congestion points to minimize impacts to local communities.

A project hotline is in place to allow the ADOT project team to respond to public questions and concerns regarding the project.

Project components:

- Deep repairs to roadway
- Repaving with rubberized asphalt
- Drainage improvements
